1. Game Overview

1.1. Common Questions

1.1.1. What is the game?

Shooting Into Space is a Part 2 of my previous Game Drift Into Space, before anything, an intergalactic love story between two star-crossed lovers. Jrrr, the protagonist, wants to rescue and take Giri'ma, his beloved damsel in distress, back to his home planet Omicron Persei 8 but he got crashed in Deserted Land unknown where he need to buy time before helped arrived so In order to Protect her he need to fight the army of spaceship that is send to take his and his beloved Giri'ma life. This is where you come in: The player is in charge of Jrrr's Guns and should help him fight the enemies to protect their life. Thus, giving them a happy ending is ultimately up to *you*.
Other than that it's a fun Htc vive Virtual Reality game for young and old.

1.1.2. Why create this game?

When somebody asks you to think about VR games, you're probably picturing a random FPS with incredible graphics, or an increasingly intricate adventure game, right? Well, a lot of VR games nowadays seem to be aiming for success with exactly those things, and it's not wrong, but aren't you tired of it? Don't you miss the very straightforward games with cool but kind of retro graphics? Only needing to press two buttons to fire and use your head to look around? Barely breaking a sweat? We do too. And this opportunity allows us to go back and relive the VR games we loved in our childhood, and we hope it makes you reminisce on yours too, even just a little.
As for the mottos: The two themes of Shooting Into Space are <u>outer space & SpaceShip</u> and <u>love story</u>. They're the top voted mottos among the four we chose, with <u>Shooting</u> and <u>mystery</u> losing.

1.1.3. Where does the game take place?

The entire game takes place in space far, far away from Earth. Jrrr starts his journey from his home planet Omicron Persei 8, which is located in the Andromeda Galaxy. His destination is Alpha Icarus 2 in the Leo constellation 14.4 billion light years away.but ends up in Deserted Land unknown**.**

1.1.4. What is the main focus?

Shooting Into Space's main focus is simply trying not to get hit and ensuring that Jrrr and Giri'ma life is saved.

2. Story

2.1.   Background story

Two planets, both alike in dignity,
In outer space, where we lay our scene,
From ancient grudge break to new mutiny,
Where alien blood makes alien hands unclean. (Wrrr Shrrr Sprrr, taken from "Lrrr and Ndnd", 69 years AL (after Lrrr))

The inhabitants of Omicron Persei 8 and Alpha Icarus 2 have lived in animosity for longer than anyone can remember, despite being several billion light years apart. While Omicronians are known for their militant and warlike temper, Icarussians are very self-important, vain and consider themselves the rulers of the entire universe. Especially descendants of the noble families are not allowed to have amorous relationships with other aliens, particularly Omicronians!

2.2.   Complete story

In the pervious story, a young Icarussian damsel named Giri'ma found the love of her life on the intergalactic dating platform Saucer™. Unfortunately for her, Mr. Perfect, also known as Jrrr, is the heir of the overall dreaded Omicronian ruler Lrrr. This doesn't stop their love from growing stronger, as they continue to secretly keep in touch in the face of imminent doom.
Since an official relationship between Jrrr and Giri'ma seems impossible to achieve, he decides to free her and give her the life she deserves with all the comfort that Omicron Persei 8 has to offer. After pimping his favourite spaceship, he sets sails and goes on to defy all general alien norms, conventions, law and even the principles of physics as he travels through space faster than the speed of light. On the way to his beloved, he encounters the strangest things of the entire universe.

In the new Story Jrrr rescue the Giri'ma but spaceship got crashed in Deserted Land unknown before he reached his home Omicron Persei 8. So he has to fight the Enemies Ships with His Guns in order to Protect himself and Giri'ma until Help Arrived from Omicron Persei 8.
